

TABLE OF CONTENTS

QUESTIONING GLOBALISED MILITARISM - *NUCLEAR AND MILITARY PRODUCTION AND CRITICAL ECONOMIC THEORY*

Acknowledgements

Chapter One:

Global Militarism and the Need for Critical Economic Theory Today

- 1.1 The Global Reach of Militarism Today
- 1.2 The Social Circuit of Capital and Marx's Reproduction Schemes
- 1.3 The Social Circuit of Capital and the Role of the Military Sector
- 1.4 The Individual Circuit of Capital: Marx's Forgotten Formula
- 1.5 The Individual Circuit of Capital and the Analysis of Nuclear Waste
- 1.6 Marxist Theories of International Trade: Samir Amin and the Question of Unequal Exchange
- 1.7 Towards a Theory of the Arms' Trade Between North and South: The Concept of Disparate Exchange
- 1.8 Subsidiary Theme: The Negative Use-Value of Capitalist Commodities
- 1.9 Subsidiary Theme: The View of Technology
- 1.10 The Ultimate Theme: The Conceptualisation of Wars
- 1.11 Conclusion: Taking Rosa Luxemburg's Life-Work Forward

PART ONE:

SOCIAL WASTE AND NON-COMMODITY WASTE AND THE INDIVIDUAL CIRCUIT OF CAPITAL

Chapter Two:

Main Characteristics of the Nuclear Production Sector

- 2.1 The 'Overlapping' Military/Civilian Sector
- 2.2 Production of Enriched and Depleted Uranium
- 2.3 Production of Civilian and Military Plutonium
- 2.4 The Destructive Character of Plutonium Production
- 2.5 Nuclear Waste as Characteristic Feature of Capital Accumulation in the Sector
- 2.6 The Paradox of the Sector's 'Productive' and 'Unproductive' Consumption
- 2.7 The Distinction Between Negative Use-Value and Negative Exchange-Values
- 2.8 The Nuclear Sector's Special Connection with the Capitalist State
- 2.9 Summary: Main Characteristics of the Nuclear Sector
- 2.10. Concluding Note: Blind Spot in Critical Economic Theory

Chapter Three:

Towards Elaboration of the Theoretical Concept of Negative Use-Value (*Disvalue*) – Or the Health- and Environmental Consequences of Nuclear Production

- 3.1 Introduction: The Insufficiency of Classical Concepts

- 3.2 The Concept of Negative Use-Value (*Disvalue*) and the Problematic of Inversion
- 3.3 The Origins of *Disvalues* in Nuclear Production: Ionising Radiation from Human Intervention
- 3.4 Ionising Radiation: Detrimental to Human Health
- 3.5 Nuclear Production and Workers' Ill Health
- 3.6 The Impact of Dumpings in the Sea – *Disvalue* for Humans and for Non-Human Nature
- 3.7 The Concept of Negative Use-Values and the Explosive Potential of Weaponry
- 3.8 The Twofold *Disvalue* of Atomic Bombs: Hiroshima and Nagasaki Revisited
- 3.9 Conclusion: Major Challenge for Critical Economic Theory

Chapter Four:

The Conceptualisation of Waste in Critical Economic Theory

– Discourse on Non-Commodity Waste and on Waste in its Social Sense

- 4.1 Introduction
- 4.2 Nuclear Waste: Instance of Non-Commodity Waste
- 4.3 Military Commodities: Exemplifying Waste in the Social Sense
- 4.4 Production of Military Plutonium: Generating Twofold Waste
- 4.5 Interconnections Between Non-Commodity Waste and 'Social' Waste
- 4.6 The Production of Social Waste Exposed via the Concept of the '*Potential Surplus*'
- 4.7 The Nature of Monopoly Capitalism Theorised by the American Marxist School
- 4.8 Monopoly Capitalism: Production of Non-Commodity Waste
- 4.9 Summary – Towards Construction of a Theory on Waste

Chapter Five:

Non-Commodity Waste in the Nuclear Production-Chain –

Limitations of Marx's Theory of Surplus Value

- 5.1 Categorising Nuclear Waste in Economic Theory
- 5.2 Applied Research in the Nuclear Sector: Its Role in Generating Waste and Waste-Related Costs
- 5.3 The Tailings from Uranium Milling
- 5.4 Mill Tailings: Generating Negative Values
- 5.5 Spent Fuel Elements: A Form of High-Level Waste
- 5.6 The Paradox of Reprocessing: Apparent Revalorisation of Depreciated Means of Production
- 5.7 'Conditioning' Waste Preceding Its Disposal
- 5.8 Final Storage of Nuclear Waste: The Issue of the Half-Life of Radioactive Isotopes
- 5.9 Nuclear Waste and the Limits to Human Knowledge: A Radical Re-Appraisal of the Theory of Surplus Value
- 5.10 Conclusion: The Theory of Value and the Accumulation of Waste

Chapter Six:

The Three Circuits of Money Capital –

Referring to Nuclear, Military, and Military-Nuclear Capital

Discourse on 'Productive'/'Unproductive' and Private *versus* Public Consumption

- 6.1 Introduction
- 6.2 Re-Conceptualising the Second Phase of the Circuit: Unproductive and Productive/Unproductive Consumption
- 6.3 Re-Conceptualising the Third Phase; Private *Versus* Public Consumption of Commodities
- 6.4 The Impact of Non-Commodity Waste and of 'Social Waste' on the Capital Circuit
- 6.5 The Circulation Phase and Beyond: The Storage of Non-Commodity Waste *Versus* the Storage of Commodities

- 6.6 The Capital Circuit of Money Capital for Military Commodities
- 6.7 The Circuit of Money Capital for Nuclear Production
- 6.8 The Capital Circuit of Military-Nuclear Capital
- 6.9 Conclusion

Chapter Seven:

**The Thesis on Waste and the Three Forms of the Circuit of Capital
–Taking the Analysis Presented by Marx in Part One of *Capital II* Forward**

- 7.1 Introduction: The Three Forms of the Capital Circuit
- 7.2 Exceptions to the Formula on the Capital Circuit
- 7.3 The Circuit of Manufacturing Capital (P) – The Impact Exerted by Nuclear Waste
- 7.4 The Processing of Waste and the Circuit of Manufacturing Capital
- 7.5 Depleted Uranium – ‘Valorisation’ of Waste
- 7.6 Transforming the Circuit of Commodity Capital
- 7.7 Solving the Riddle of Nuclear Production (1): Transfer of Responsibility for Expenditures
- 7.8 The Riddle of Nuclear Production (2): Delaying the Dismantling of Nuclear Facilities
- 7.9 Concluding Note: Towards a General Theory on Waste and the Individual Circuit of Capital?

Chapter Eight:

**The Decommissioning and Dismantling
of Nuclear Production Facilities – Discourse on Ultimate Waste**

- 8.1 Introduction
- 8.2 Historical Method to Mask Waste-Related Costs: Ignoring the Calculations for Ultimate Waste
- 8.3 Nuclear Production and the Method of ‘Discounting’ – The Costs for Dismantlement of Nuclear Facilities Masked
- 8.4 Decontamination and the Transfer of Negative Values
- 8.5 The Special Meaning of the Decontamination of Vitrification Factories and of Other Waste-Processing Facilities
- 8.6 Decontamination of Ultimate Waste from a Military-Nuclear Production Facility
- 8.7 Entombment as Strategy – Sarcophage-Building in Chernobyl
- 8.8 The Communications’ Sector and the Problem of Ultimate Waste
- 8.9 Summary

Chapter Nine

**Accidents in Military-Nuclear Production Facilities:
Ultimate Illustration of the Thesis on Waste**

- 9.1 Introduction: Delineating the Topic
- 9.2 Fire Accidents in Graphite-Moderated Production Sites: The Accident in Windscale Compared to that in Chernobyl
- 9.3 The Windscale Accident: Wasteful Production Resulting in Further Waste
- 9.4 Tank Leakages and Tank Explosions: Major Risk Factors Associated with Reprocessing Facilities
- 9.5 Near-Accident at the Hanford Nuclear Complex, USA
- 9.6 The Hanford Leakages from Storage Tanks
- 9.7 Catastrophic Consequences of the Tank Explosion at the Cheliabinsk Complex
- 9.8 Catastrophic Environmental Impact of Radio-Active Waste Dumping
- 9.9 Conclusion: Military-Nuclear Production and Economic Theory

Appendix to Part One:

Nature's Contribution to Value Creation –
The Capital Circuit for the Mining Industries

PART TWO:
THE MILITARY SECTOR
AND THE SOCIAL ACCUMULATION OF CAPITAL

Chapter Ten:
**The Social Circuit of Capital, Military Production and the Capitalist State –
Revisiting the Scheme on Simple Reproduction Laid Down by Karl Marx in
Capital II**

- 10.1 Introduction
- 10.2 Marx's Analysis of Social Accumulation: Two Basic Departments of Production
- 10.3 Comparison of Marx's with Quesnay's Diagram: Both Progression and Retrogression
- 10.4 The State as Revenue Holder and as Organiser of Arms' Production
- 10.5 The State in the Diagram on Social Reproduction
- 10.6 Hypothesis of a Third Department: Comparing the Production of Arms with that of Luxury Goods
- 10.7 The Hypothesis of a Third Department: Rosa Luxemburg's Analysis of Money Production
- 10.8 The Hypothesis of a Department for Production of the Means of Destruction (**MD**) - Implications for Marx's Reproduction Scheme
- 10.9 Conclusion

Chapter Eleven:
**The State's Role in the Transformation of Production Relations
in Europe – The Construction of Warships and the Rise of Capitalism**

- 11.1 Introduction
- 11.2 Venice: State-Guided Production of Arms
- 11.3 A Cooperative Form of Artisan Production
- 11.4 The *Arsenal* and Marx's Analysis of the Manufacturing Stage
- 11.5 England and France in the 16th and 17th Centuries: Arms' Production Partly Subcontracted by the State
- 11.6 England's Rise to Primacy and the State-Guided Drive to Accumulate
- 11.7 The State and the Growth of Department I: The Department Generating Means of Production (**MP**)
- 11.8 The State and the Growth of Department II: The Department Generating Means of Consumption (**MC**)
- 11.9 Conclusion: The State and the Historical Transition towards Capitalism

Chapter Twelve:
**State-Borrowings and Militarism
In the History of Great Britain**

- 12.1 Introduction
- 12.2 Eighteenth Century Wars and the Growth of the Public Debt
- 12.3 The Concept of Guaranteed Loans: Decisive Innovation

- 12.4 Long-term Borrowing and Social Accumulation
- 12.5 The Role of Foreign Capital: Contributions of Dutch Lenders
- 12.6 Britain's State-Debt as Prolonged Issue
- 12.7 State Borrowings and Marx's Accumulation Model
- 12.8 Foreign Lending and Marx's Accumulation Model
- 12.9 Conclusion: The Financial Revolution in Britain's History

Chapter Thirteen:

**Arms' Production and the Growth of Capitalist Monopolies -
On the Historic Foundations of Department III
(for Production of the Means of Destruction (MD))**

- 13.1 Introduction
- 13.2 Trends in Britain's Military Expenditures: *The Naval Defence Act* (1889) and the Boer War (1899-1902)
- 13.3 The Country's Shift towards Increased Reliance on Private Corporations
- 13.4 Military Production and the Building of Production Combines
- 13.5 US-War Allocations During World War 'Two': Privileging Monopoly Companies
- 13.6 The War-Time Structure of Regulations
- 13.7 The 'Reconversion Debate': Opposition Against the Interests of Small Business
- 13.8 US Accumulation During World War 'Two': The Possibility of *Dis-complementarity*
- 13.9 Conclusion: From Hypothesis Towards a Thesis on the Process of Reproduction Under Monopoly Capitalism

Chapter Fourteen:

**The Social Circuit of Capital, Military Production and the Hegemonic
Capitalist State – Revisiting Marx's Scheme on Expanded Reproduction**

- 14.1 Introduction
- 14.2 Basic Meaning of Expanded Reproduction: A New Destination for the Capital Surplus
- 14.3 Expanded Reproduction: Additional Investments in Each Department
- 14.4 The Re-division of the Surplus in a Scheme that Includes Department III *and* the Revenue-Holding State
- 14.5 Differential Production Equations: Department III *Versus* Departments I and II
- 14.6 The Three Equations Stated
- 14.7 Conceptualising the Flow of Money in a Scheme of Expanded Reproduction with Four 'Poles'
- 14.8 The Diagram on Expanded Reproduction and the Growth in Unproductive Consumption
- 14.9 Conclusion: the Scheme on Social Reproduction and the Business Cycle Driven by the Militarist State

Chapter Fifteen:

**The Costs of Military Research and 'Development' (R & D)
and the Nature of Its Outcome –
Growth of the Forces of Destruction in the Era of Monopoly Capitalism**

- 15.1 Introduction: Focusing the Issue
- 15.2 The Typology of Military Research: From Basic Research to Construction of Prototypes
- 15.3 The Construction of Prototype Weapons: Revisiting Marx's Analysis of the Circuit of Capital
- 15.4 The Construction of Prototype Weapons and the Discussion on the Total Production Circuit
- 15.5 The State's Fund for the Development of Military Technology

- 15.6 The Construction of Prototype Weapons and the Transfer of Costs to the State
- 15.7 New Military Commodities and the Discussion on Technology
- 15.8 Nuclear Technology and the Discussion on Destructive Forces
- 15.9 Conclusion: The Development of the Forces of Destruction under Monopoly Capitalism

Chapter Sixteen:

The Marxist Debate on Periodic Crises

Quantitative and Qualitative Dis-proportionality.

Towards Integration of the Military Sector into Crisis Theory

- 16.1 Introduction
- 16.2 Lack of Appropriate Supply of and/or Demand for Goods
Or: Quantitative and Qualitative *Dis-proportionality*
- 16.3 *Dis-proportionality* as a Condition of the Accumulation Process Itself
- 16.4 The Growth of Fixed Capital: Basis of the Cyclical Movement of Accumulation
- 16.5 Railroad Construction Programmes and Nineteenth Century Business Cycles
- 16.6 Tugan-Baranovski's Theory – *Dis-proportionality* Between Production Departments
- 16.7 Tugan's Basic Error: Counter-posing Quantitative and Qualitative *Dis-proportionality*
- 16.8 The Military Sector as Additional Cause of Crises: Along with the Negative Effect of Taxation Policies
- 16.9 Combination of Quantitative and Qualitative *Dis-proportionality* as Two Consecutive Causes of Periodic Crises

Chapter Seventeen:

The Military Sector and the Business Cycle in the Hegemonic

Capitalist Economy - Department III as 'Discomplementary' Sector

- 17.1 Introduction: the Thematic of *Dis-proportionality*
- 17.2 US Business Cycles in the Twentieth Century: Choice of Reliance on the Military Sector
- 17.3 The Government Budget as Indicator of the US's Reliance on the Military Sector
- 17.4 The Military Sector and Social Accumulation: The Continuously Large Budget Size in the 1950s
- 17.5 Poignant Example of *Dis-complementarity*: The US Business Cycle in the 1980s
- 17.6 The *Dis-complementarity* of Department III: Growth at the Expense of Accumulation in I and II
- 17.7 *Dis-complementarity* and its Effects: The Military Sector as Cause of Capitalist Crises
- 17.8 Semi-Permanent Reliance on Military Production: Differences Between Department III, and I + II
- 17.9 Conclusion: the *Dis-complementary* Sector – Additional Factor Complicating the Accumulation Process

Chapter Eighteen:

The Scheme on Expanded Reproduction,

Foreign Loan Capital and the Hegemonic Economy

- 18.1 Introduction
- 18.2 The State and the Hegemonic Economy: New Directions of Flows, New Equations

- 18.3 The State and the Flow of Money Capital: The Macro-Economic Impact of State-Borrowings
- 18.4 The Equations Relating to Department III: Differentiating Between Sources of ‘Sectoral’ Demand
- 18.5 Purchases of State-Loans by Foreign Holders of Money Capital: Defining their General Effects
- 18.6 The Overall Impact of the Inflow
- 18.7 The Influence on the Business Cycle: Counterbalancing the Internal Pressures
- 18.8 The Influence on the Business Cycle: Effects from Withdrawals of Foreign Loan Capital
- 18.9 Conclusion

Epilogue to Part Two:

The War of Aggression in Iraq and the US Business Cycle

PART THREE

***ARMS’ EXPORTS AND THE STRUCTURE OF WORLD TRADE
- INTERNATIONAL CIRCUITS OF CAPITAL***

Chapter Nineteen:

**Unequal Exchange Versus Disparate Exchange – a Theoretical Comparison.
Succession and Coexistence of Two Imperialist Trading Mechanisms**

- 19.1 Introduction
- 19.2 The Theory of Unequal Exchange: Relative Immobility of the ‘Factor’ Labour
- 19.3 ‘Unequal Exchange’: The Issue of Differential Levels in the Development of the ‘Productive Forces’
- 19.4 The Disarticulation of Dependent Economies
- 19.5 Disparate Exchange: Historical Transition in Trading Mechanisms
- 19.6 Unequal Exchange and Disparate Exchange: Co-existing Mechanisms of Exploitation
- 19.7 The Issue of the Co-Existence of Injust Exchanges Stated in Terms of the Revised Letter Codes of Karl Marx
- 19.8 Disparate Exchange: Differential Levels in the ‘Development of the Forces of Destruction’
- 19.9 Conclusion

Chapter Twenty:

**US-Imperialism and the Emergence of Disparate Exchange.
The Middle East and the Transition from Unequal to Disparate Exchange**

- 20.1 Introduction
- 20.2 The Nixon Doctrine and the American Business Cycle
- 20.3 US Policy making and the Historic Price Rise for Oil: Imperialism Supporting the Emancipation of the South?
- 20.4 OPEC’s Rise Evaluated from Two Perspectives: Unequal Exchange and Disparate Exchange
- 20.5 Oil-Rich Iran and the Export Orders for US Armament Corporations
- 20.6 Saudi Arabia. Pivot of the US’s Strategy on Oil and Arms
- 20.7 The Prices of Raw Materials and Disparate Exchange: Key Difference with the Theory of Unequal Exchange
- 20.8 Changed Taxation Policies: Basis for Implementation of Disparate Exchange
- 20.9 Summary on Disparate Exchange and the Middle Eastern Region

Appendix to Chapter Twenty:

The Methodology of Disparate Exchange:
Oil and the Angolan Civil War

Chapter Twenty-One:
African Least Developed Countries (LDCs) :
The Coexistence Between Unequal and Disparate Exchange

- 21.1 Introduction
- 21.2 Globalisation and Sub-Saharan Africa
- 21.3 The Evidence on Increasing Poverty in Countries Exporting Primary Commodities
- 21.4 The Battle Against Protectionism: Common Interest Between Countries of Different Continents
- 21.5 Unequal Exchange: Enduring Problem for Countries in Africa
- 21.6 Analysis: Return to the Discussion on Productivity Levels
- 21.7 The Issue of Export Diversification Revisited
- 21.8 Fuel Exporters *Versus* Exporters of Non-Fuel Commodities
- 21.9 Disparate Exchange in the Context of Africa: The Cases of Angola and Sudan
- 21.10 Conclusion: Co-Existing Trade Mechanisms

Chapter Twenty-Two:
Turkey in the Structure of Disparate Exchange

- 22.1 Introduction
- 22.2 The Building of an Indigenous Military Sector
- 22.3 Joint Ventures: Production of the F-16 Fighter Plane
- 22.4 'Off-set' Agreements
- 22.5 Conclusion: An Early End to Disparate Exchange?

Chapter Twenty-Three:
Arms' Exports and the Process of Accumulation in Central Economies
- Towards a General Theory of International Arms' Trade

- 23.1 Introduction
- 23.2 The Individual Circuit: Covering the Costs for Research & Development
- 23.3 The Individual Circuit: Extending the Number of Production Cycles
- 23.4 The Social Circuit: Exports as 'Substitution Orders'
- 23.5 Substitution Orders in 'Peace-Time': The Problematic of Idle Production Capacity
- 23.6 Substitution Orders and the Military Sector's Status as Semi-Permanent Department of Production
- 23.7 Export Credit Guarantees: Intervention of Northern States to Protect Arms' Export Markets
- 23.8 Export Credits and Disparate Exchange: Complementary Finance Mechanisms
- 23.9 Conclusion: Critical Economic Theory and the Combined Thrust For Arms' Exports

Chapter Twenty-Four:
Disparate Exchange and the Consumption of Arms -
Conceptualising Wars under Capitalism

- 24.1 Introduction
- 24.2 A Letter Code to Conceptualize War-Activities: Consumption of Military Commodities
- 24.3 Disparate Exchange and the Consumption of Arms

24.4 Disparate Exchange in the Context of Southern Civil Wars
24.5 Unequal Exchange, Disparate Exchange and the Consumption of Weaponry
24.6 Unequal Exchange, Disparate Exchange and the Occurrence of Wars in the South
24.7 A Brief Commentary on the Case of Nuclear War
24.8 Nuclear Wars and Marx's Theory of Labour Value
24.9 Conclusion
